Memory Assessment Action

Sixteen volunteers from Swire Coca Cola HK conducted memory assessment for elders of our Bliss District Elderly Community Centre (BDECC) on 22 April to identify those who have a tendency for dementia for early intervention.

Before conducting the assessment, social workers of BDECC briefed the volunteers on dementia and explained the assessment tools and its usage in details.

There were 61 elders who undertook the assessment. We hope more similar activities can be arranged in future to benefit more elders so that they could obtain early treatment and support.
